One Connected Platform for Smarter Property Management

WaslProp is a modern, cloud-based property and strata management platform that connects properties, people, maintenance, contractors, financial administration and everyday operational workflows.

Built to simplify complex property operations, WaslProp helps management teams cut manual administration, strengthen accountability and gain clear visibility across their portfolios.

CORE CAPABILITIES

Property & Strata Management

Manage buildings, units, lots, owners, tenants and property records from one centralised platform.

Maintenance & Work Orders

Streamline requests, contractor assignment, work orders, progress tracking and completion records.

Contractor & Procurement

Manage contractors, compliance documentation, quotations, procurement approvals and variations.

Financial Management & Budgeting

Set opening positions, manage property funds, prepare annual budgets and keep approved budget histories.

Communications & Digital Workflows

Centralise announcements, notifications, documents and approvals — with WaslSign digital signing built in.

AI-Powered Operational Assistance

Use Wasl AI to retrieve property information, interpret documents and support better operational decisions.

WHY WASLPROP

Less Administration
Less manual work, fewer spreadsheets.

Greater Visibility
All property operations in one place.

Better Accountability
Clear approvals and activity histories.

Connected Workflows
Teams, contractors and owners aligned.

Built to Scale
Grow without adding overhead.

WHO IT'S FOR Strata and condominium management companies, property managers, building and facilities managers, and organisations managing residential or mixed-use property portfolios.

AVAILABILITY ● Live in Australia | In development — UAE, United States & Canada
