Core financial journeys

A complete financial record for every scheme

WaslProp keeps one connected financial picture per strata scheme — from the annual budget through to the balance each lot owner holds today. Every figure on this page is drawn from the live Harbour View Strata demonstration scheme.

ANNUAL BUDGET	LEVIES ISSUED TO LOTS	CURRENTLY OVERDUE	UNAPPLIED OWNER CREDITS
AUD 144,000.00	AUD 124,368.42	AUD 29,368.42	AUD 500.00

1

Scheme set-up

Financial year, funds and opening balances are configured once per scheme, with no historical activity invented before the agreed start date.

2

Budgeting

Annual budgets are built fund-by-fund, revenue against expenditure, with a full version history as revisions are approved.

3

Levy issuance

Quarterly or special levies are raised against the budget and issued to lots instalment by instalment, each one separately recorded.

4

Lot accounts

Every lot has its own running account — charges, receipts and balance — with a statement available at any time.

5

Receipts & payments

Owner payments are recorded against the bank and allocated to specific levy charges, or held as credit until the owner's next charge.

6

Arrears & collections

Overdue balances are identified automatically by ageing bucket, with a managed workflow for follow-up and reminder letters.

7

Oversight & audit

Every transaction is posted to a full general ledger, so the committee and its accountant can always see a balanced, auditable record.

Next up

Bank feed reconciliation is in development — see the roadmap page at the end of this document.

1 Getting a scheme's finances set up

Before any levy is raised, the committee's financial year, funds and chart of accounts are configured — and WaslProp never fabricates history before the agreed start date.

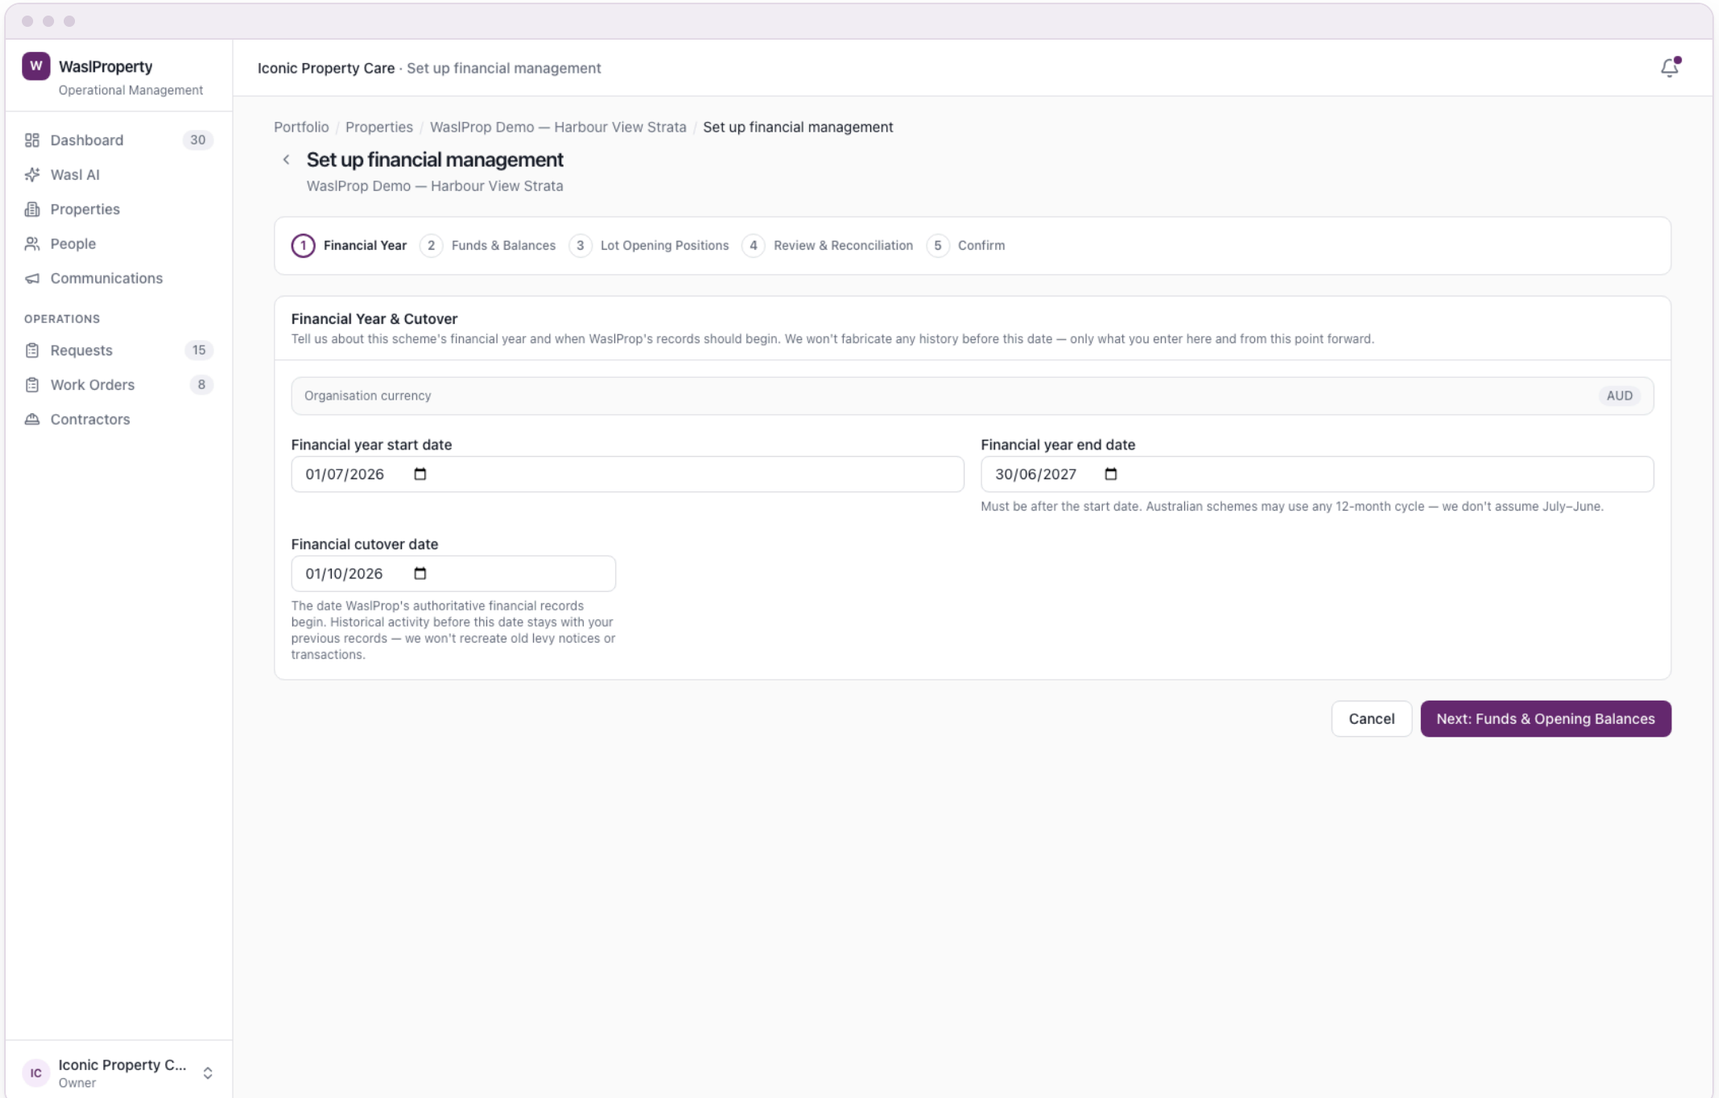

BUSINESS SCENARIO

A new strata manager is bringing Harbour View Strata onto WaslProp partway through a financial year. They need the scheme's funds and cut-over date set up before any transaction can be recorded.

1. **Confirm the financial year**
   Start, end and cut-over date — any 12-month cycle, not assumed to be July–June.
2. **Set up funds & balances**
   Administration and Capital Works funds, each with its own ledger accounts.
3. **Record opening positions**
   Each lot's starting balance, carried in from the scheme's previous records.
4. **Review & confirm**
   A reconciliation check before the scheme goes live on the platform.

WHY IT MATTERS

A clean, agreed starting point means every figure WaslProp shows afterwards can be trusted — nothing is backfilled or guessed.

Setting the financial year and cut-over date for Harbour View Strata

2 Planning the year's budget

Each financial year starts with a fund-by-fund budget — the figure every levy for the year is ultimately raised against.

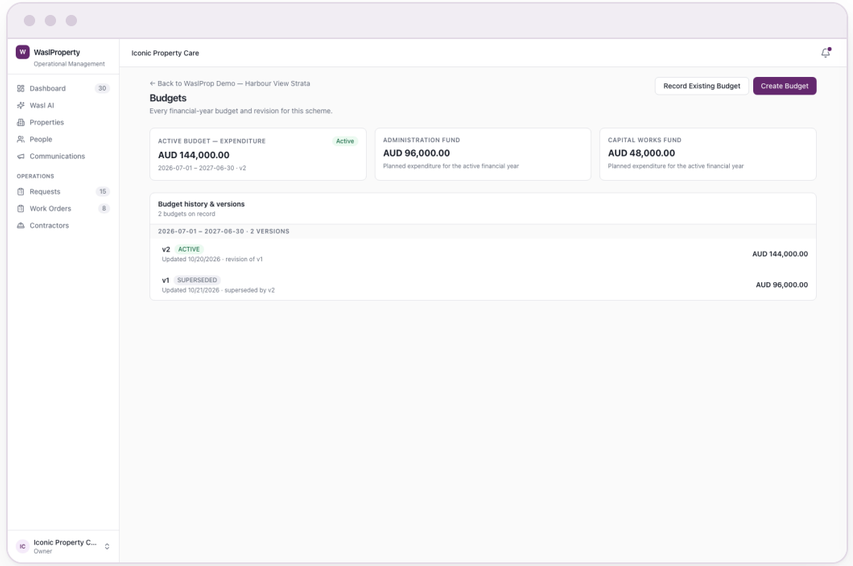

BUSINESS SCENARIO

The committee approves Harbour View Strata's FY2026/27 budget: AUD 96,000 for Administration Fund running costs and AUD 48,000 for the Capital Works Fund. A revision adds the Capital Works lines after the first draft.

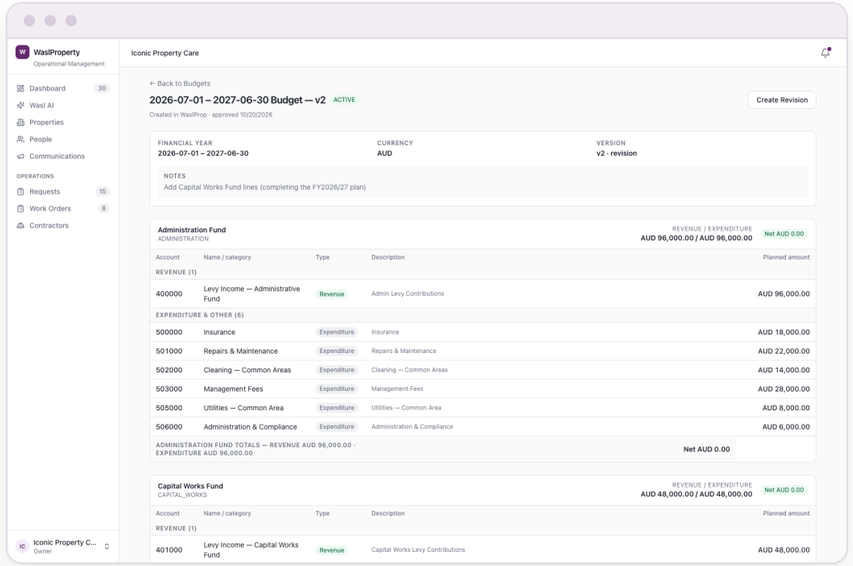

1. **Build the budget**
   Revenue and expenditure lines entered per fund, by account.
2. **Revise if needed**
   A new version is created rather than overwriting the approved figure.
3. **Approve & activate**
   The active version becomes the reference point for levy issuance.

WHY IT MATTERS

A full version history means the committee can always see what changed between drafts, and when — without losing the original figures.

Budget overview — AUD 144,000 across two funds

Administration Fund budget lines, v2

3 Issuing levies to lot owners

Once a budget is approved, quarterly or special levies are raised against it and issued to every lot — instalment by instalment.

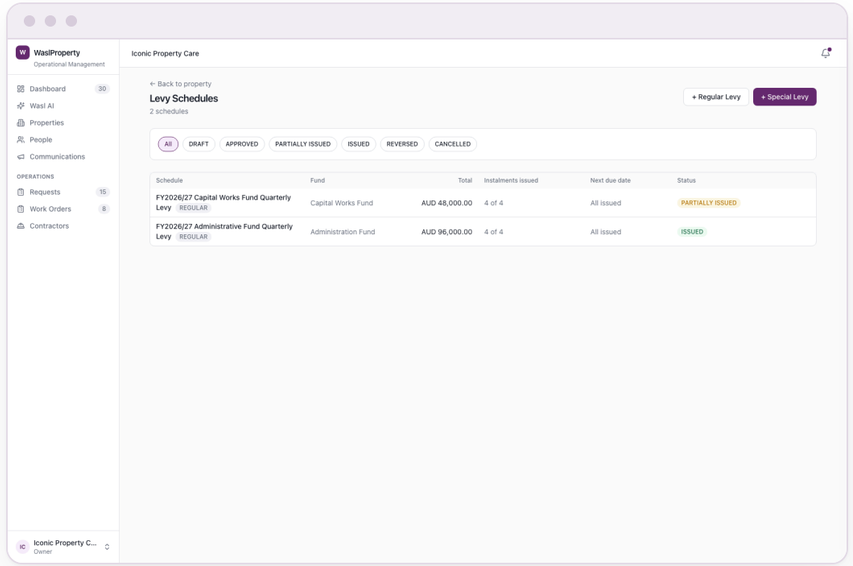

BUSINESS SCENARIO

Harbour View Strata's Administration Fund levy is issued as four quarterly instalments of AUD 24,000 each (AUD 96,000 for the year), apportioned across the scheme's 12 lots and posted to each lot's account as it falls due.

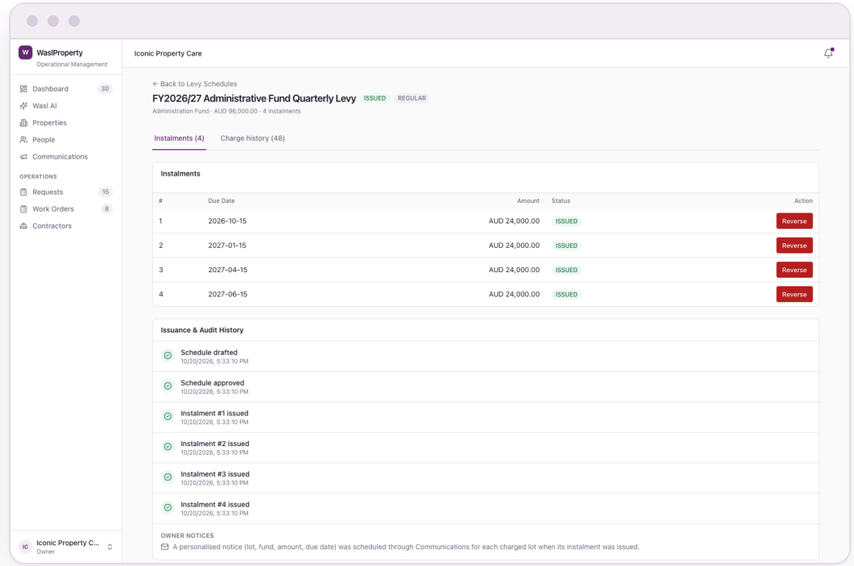

1. **Draft the schedule**
   Total amount, fund and instalment dates for the year.
2. **Approve**
   Confirms the schedule is ready to issue.
3. **Issue each instalment**
   Posted on its own due date — never all at once — with an owner notice for each lot.

WHY IT MATTERS

Instalments landing on their real due dates keeps each lot's statement accurate to the day, and gives owners advance notice of what's coming.

Administration and Capital Works levy schedules

Four instalments issued, with a full audit history

4 Every lot has its own financial account

Charges, receipts and balance for each lot are tracked individually — the same record an owner would expect from their own statement.

BUSINESS SCENARIO

Lot 1's owner, Sarah Thompson, wants to know where her account stands. Her financial account shows AUD 13,642.11 owing, apportioned across both funds, with every charge and receipt that brought her to that figure.

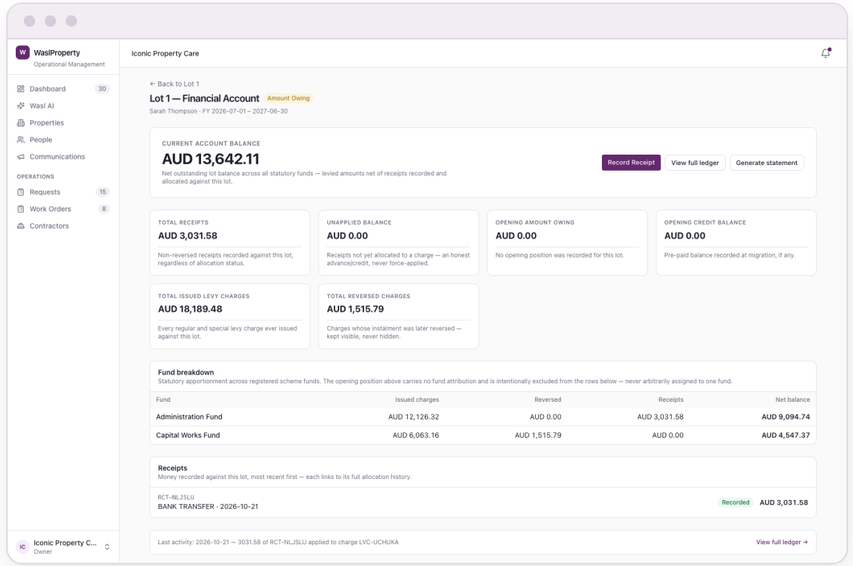

1. **Account balance**
   Total owing, by fund, updated with every transaction.

2. **Receipts & charges**
   Everything issued and received against the lot, in one place.

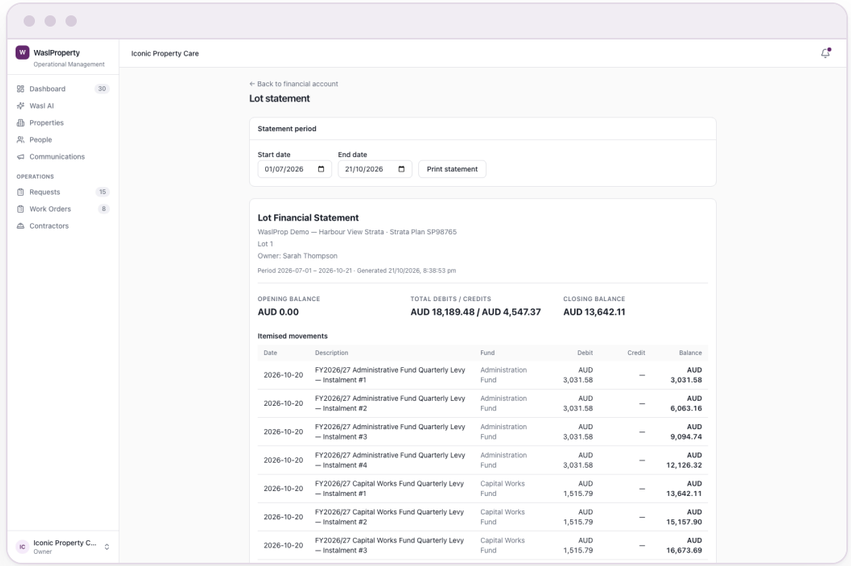

3. **Statement on demand**
   A printable statement for any date range, for the owner or their agent.

WHY IT MATTERS

Owners and strata managers can answer "what do I owe and why" in seconds, with the full transaction trail behind the number.

Lot 1 — financial account, fund breakdown and receipt history

Lot 1 — printable statement of itemised movements

5 Recording and allocating owner payments

A payment is recorded against the bank first, then allocated to the specific levy charge it pays — or held as credit if the owner pays early.

BUSINESS SCENARIO

Sarah Thompson (Lot 1) pays her Q1 Administration levy of AUD 3,031.58 by bank transfer, and it is applied in full. Separately, Michael O'Brien (Lot 4) sends AUD 500 ahead of his next levy — left unapplied until a charge exists to allocate it against, never force-applied.

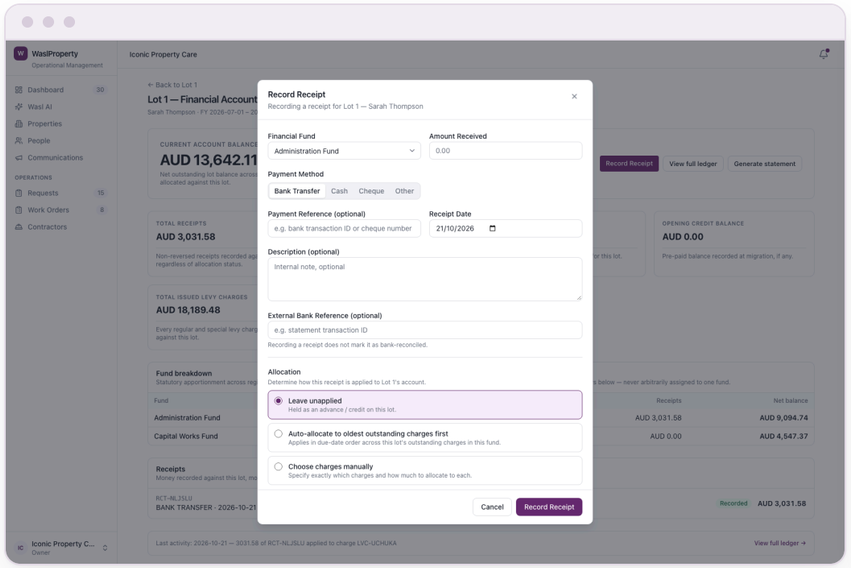

1. **Record the receipt**
   Amount, method and reference, against the right fund.

2. **Choose how to apply it**
   Leave unapplied, auto-allocate oldest-first, or choose charges manually.

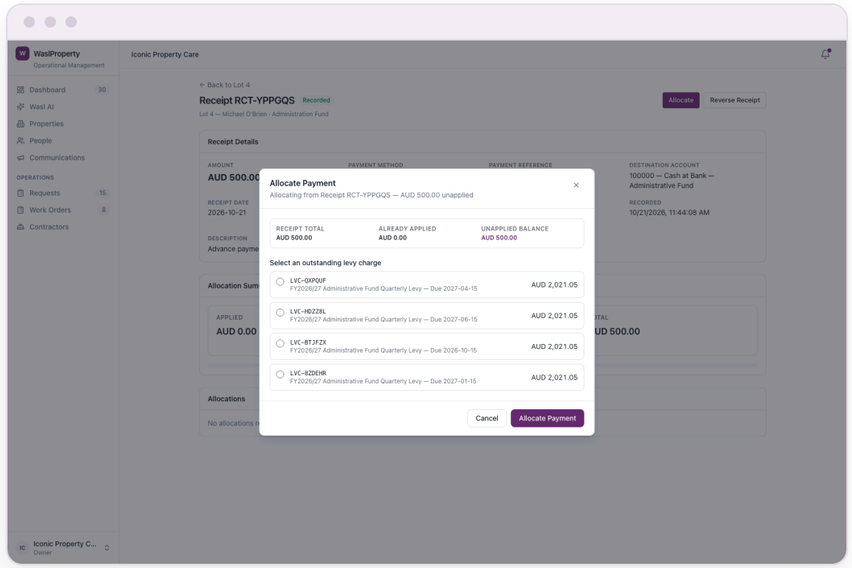

3. **Allocation is recorded**
   Applied and unapplied balances are always visible on the receipt.

WHY IT MATTERS

Owner credit is never assumed to belong to a specific charge — it stays visible as "available" until someone deliberately allocates it.

Recording a bank transfer receipt for Lot 1

Allocating Lot 4's advance payment to an outstanding charge

6 Identifying and following up arrears

Overdue balances are calculated live from each lot's charges and payments, grouped by age, with a simple workflow for following up.

BUSINESS SCENARIO

As of 21 October 2026, 12 of Harbour View Strata's lots have an amount overdue — AUD 29,368.42 in total, all within the 1–30 day bucket. The strata manager opens a collection case for Lot 1 and drafts a reminder letter for review.

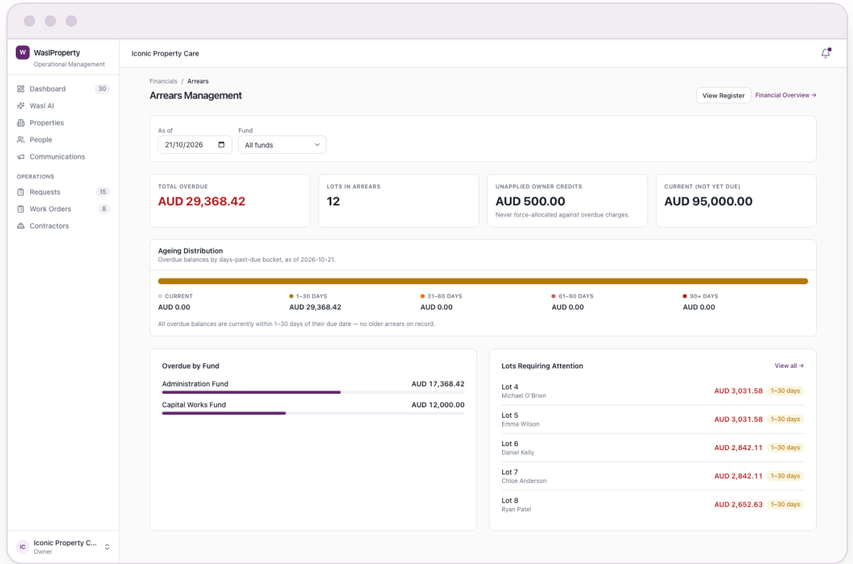

1. **See the dashboard**
   Total overdue, ageing distribution, and the funds most affected.

2. **Drill into the register**
   Every lot in arrears, sortable and searchable, with running totals.

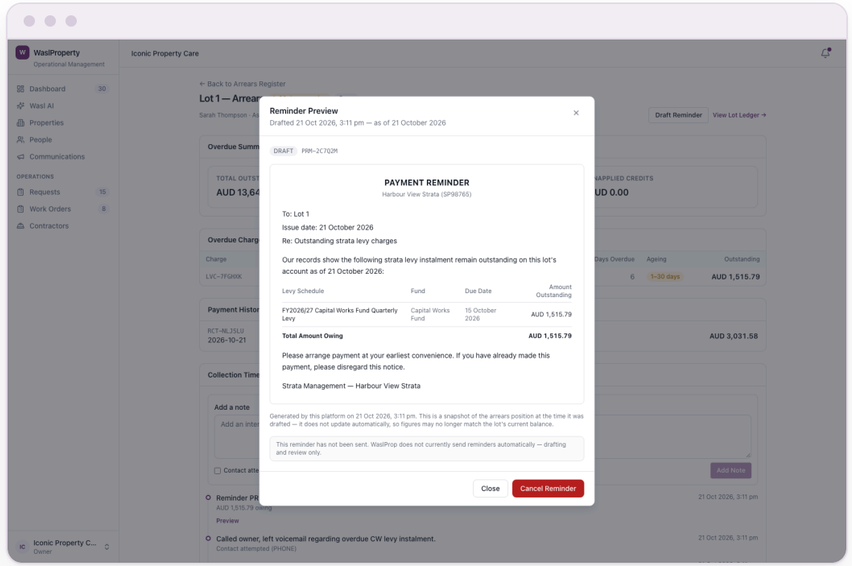

3. **Open a case & follow up**
   Log contact attempts and draft a reminder letter for review before anything is sent.

WHY IT MATTERS

Reminder letters are drafted for review, never sent automatically — the strata manager stays in control of every owner communication.

Arrears dashboard — AUD 29,368.42 overdue across 12 lots

A draft reminder letter, awaiting review — not yet sent

7 A balanced, auditable record behind every figure

Every transaction in WaslProp — levies, receipts, allocations — posts to a full general ledger, so the committee's accountant always has a complete, balanced record to work from.

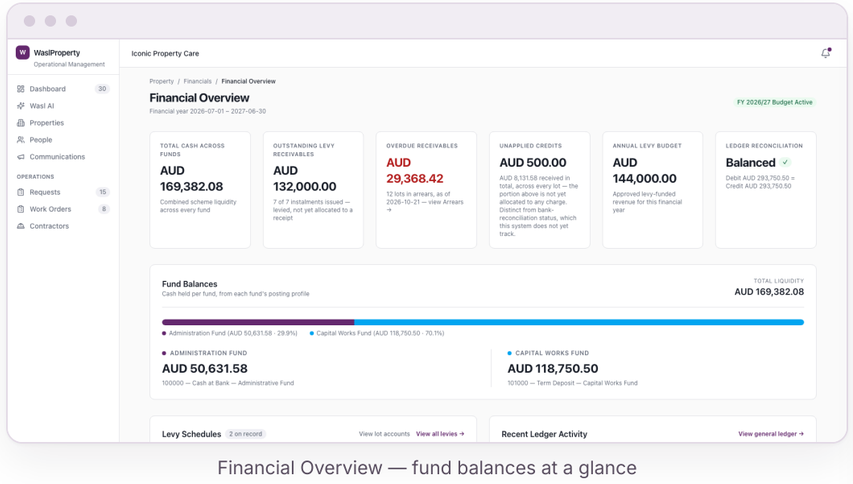

BUSINESS SCENARIO

Harbour View Strata's committee wants assurance that the numbers on every lot statement tie back to the scheme's overall accounts. The Financial Overview and General Ledger give a single, always-balanced answer.

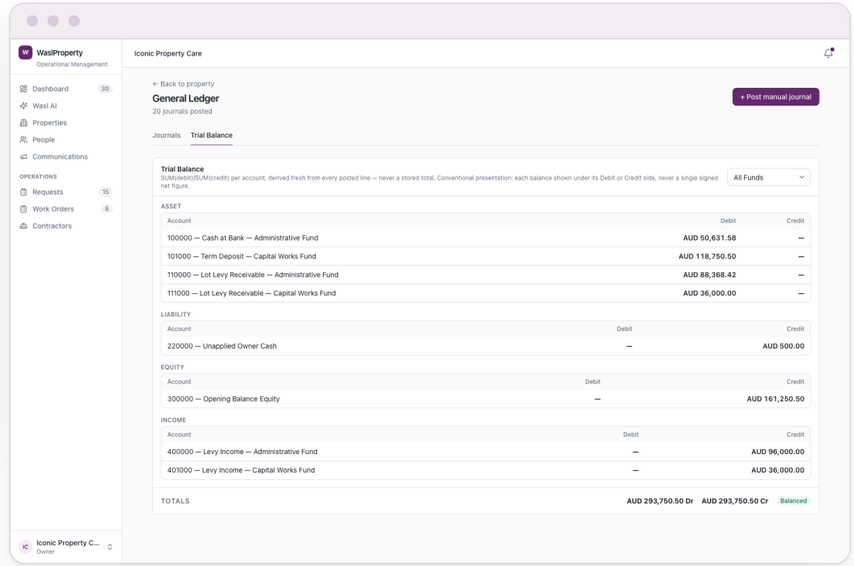

1. **Financial overview**
   Cash, receivables and fund balances for the whole scheme, at a glance.
2. **General ledger**
   Every journal entry, fully itemised and traceable to its source.
3. **Trial balance**
   Debits and credits confirmed equal, fund by fund, on demand.

WHY IT MATTERS

Nothing is a stored "total" that can drift — every balance shown is calculated fresh from the underlying ledger entries, every time.

Financial Overview — fund balances at a glance

Trial Balance — AUD 293,750.50 debit and credit, balanced

How it all connects — Harbour View Strata

The same demonstration scheme used throughout this document, as of 21 October 2026 — showing how a budget becomes a levy, a levy becomes a lot balance, and a lot balance becomes an overdue figure the committee can act on.

STEP	WHAT HAPPENED	AMOUNT (AUD)
1. Budget approved	FY2026/27 budget — Administration Fund AUD 96,000, Capital Works Fund AUD 48,000	144,000.00
2. Levies issued	Quarterly instalments issued across both funds to all 12 lots	124,368.42
3. Receipts applied	Owner payments recorded and allocated against outstanding charges	4,547.37
4. Held as credit	One advance payment (Lot 4) not yet allocated to a charge	500.00
Net outstanding today	**Across all 12 lots, both funds**	**124,368.42**
Of which, overdue	**Past due date, 1–30 day ageing bucket**	**29,368.42**

What's available today

A summary of the financial management capabilities shown in this document, grouped by area.

Scheme set-up

- Financial year & cut-over configuration
- Fund structure (Administration, Capital Works)
- Chart of accounts per fund
- Lot opening balances

Budgeting

- Fund-by-fund annual budgets
- Revenue & expenditure lines by account
- Full revision/version history

Levies

- Regular and special levy schedules
- Instalment-by-instalment issuance
- Owner notices on issuance
- Reversal with full audit trail

Lot accounts

- Per-lot running balance, by fund
- Full charge & receipt history
- Printable statements, any date range

Receipts & payments

- Receipt recording against the bank
- Manual, auto, or unapplied allocation
- Reversal of receipts and allocations

Arrears & collections

- Live ageing by days overdue
- Arrears register, searchable and filterable
- Collection cases & follow-up notes
- Draft reminder letters (review only)

Oversight & audit

- Financial overview dashboard
- Full general ledger, every journal
- Trial balance, calculated live

Multi-fund & multi-currency

- Statutory fund separation (NSW-style)
- AUD throughout, scheme currency configurable

Coming next

- Bank feed reconciliation
- See the roadmap on the following page

Roadmap

WaslProp's financial management capability continues to develop. Items marked "Next" are in progress and not yet committed to a delivery date.

LIVE TODAY

Scheme set-up, budgeting, levies, lot accounts, receipts, arrears & collections, general ledger

Every journey shown in this document is available now, demonstrated on the Harbour View Strata scheme.

NEXT

Banking & Reconciliation

Matching bank statement lines to recorded receipts, to confirm the cash ledger reflects what has actually cleared the bank.

NEXT

Automated reminder delivery

Sending reviewed reminder letters directly to owners — building on today's draft-and-preview workflow.

ABOUT THIS DOCUMENT

Every screen, figure and scenario shown in this document reflects WaslProp's current functionality, demonstrated on a representative strata scheme. Items shown as "Next" are planned but not yet available.
